FACTS ABOUT

"AA QUALITY" FERTILIZERS

"AA QUALITY" Fertilizers make bigger yields and better quality crops:

Because they are made from the best materials obtainable;

Because they are so scientifically prepared as to provide a continuous supply of properly balanced and readily available plant food from planting to maturity;

Because they are in such perfect mechanical condition as to ensure easy and even distribution of plant food to the root-feeding area.

It pays to use "AA QUALITY" Fertilizers. The best is always the cheapest in the end.

SEND FOR OUR NURSERY CATALOGUE

This catalogue contains a very complete list of Trees, Shrubs, Vines, Roses and Perennials that thrive in New England.

Start your perennial border with plants and then add to it by growing your own perennials from seed.

HARDY PERENNIAL AND BIENNIAL FLOWER SEED

While we offer only the most important varieties here, we will gladly get special kinds and colors if desired. These are easily grown from seed and should be sown by June 1st to produce the best results. Transplant to their permanent quarters in fall.

Biennials are plants which require two seasons to come to full maturity, after which they ripen their seed and die off.

Perennials go on living and increasing for a number of years, the stems dying down each season and coming again from roots each spring.

Alyssum Saxatile Compactum (Basket of Gold). Produces masses of bright yellow flowers in spring, $\frac{1}{4}$ oz. 40c, pkt. 10c.

A MESSAGE TO GLADIOLUS LOVERS

The Gladiolus is now a great factor in any gardening scheme, and the demand is greater each year. The remarkable gain in popularity which this wonderful flower has made in recent years is due in a large measure to the appreciation it has won in the minds of flower-loving people, as a cut flower and as a garden flower. The easy culture appeals to all and there is no other flower that gives such a limitless array of color and shade of colors.

You cannot get any plants more profuse in worthwhile bloom, nor can you find any flowers superior for cutting.
